SUMMARY

Full-Stack Engineer (React, Next.js, Firebase) | AI API Integration (Gemini, MediaPipe) | Health Hackathon '26 National Finalist | NPTEL Cloud Top 5%

EDUCATION

Vellore Institute of Technology (VIT), BhopalBhopal, India
Bachelor of Technology - Computer Science & Engineering; CGPA: 8.83*/10; | No Active Backlogs 2024 - 2028

SKILLS SUMMARY

Languages	Java, Python, JavaScript, TypeScript, C++, SQL
Web & Backend	React.js,Next.js, Node.js, REST APIs, HTML5, CSS3, Tailwind CSS, Web Assembly, PWA
Cloud & AI	Firebase, GCP, Vercel, Git, CI/CD, Gemini API, MediaPipe, RBAC

PROJECTS

Gati Rehab — AI Physiotherapy & Remote Rehabilitation PWA ([WEBSITE LINK](#)) Jan 2026 – Present

- National Finalist — Top 60 / 600+ teams, Health Hackathon '26 (VIT Bhopal × Johns Hopkins University)
- Built offline-first PWA using Media-pipe pose detection (33 endpoints) for real-time exercise guidance, posture correction & ROM scoring — zero server dependency, works in low-connectivity regions
- Dual-role system: patients get real-time feedback & progress tracking; doctors get ROM analytics dashboard, adherence trends & remote session assignment — backed by Firebase Auth, Firestore, PWA service workers & Recharts

Tech Stack: React.js, Vite, Firebase Auth, Firestore, MediaPipe, PWA (Service Workers), Recharts, JavaScript

AnyFileForge — Privacy-First File Processing Platform [50+ Tools] ([WEBSITE LINK](#)) Jan 2026 – Present

- Built a privacy-first file processing platform with 50+ tools (PDF, image, developer utilities) — all compute runs client-side via WebAssembly for zero data exposure
- Node.js/Express backend with secure API routes, rate limiting, and server-side OCR; Firebase Auth, Firestore & Storage for cloud workflows
- PWA-installable on desktop & mobile with multilingual support (English, Hindi, Spanish) via i18next

Tech Stack: React.js, Vite, Node.js, Express.js, Firebase, WebAssembly, TypeScript, JavaScript, i18next, REST APIs

SwiftCheck-FYI — QR-Based Attendance System [Live, Used in Production] ([SOURCE CODE](#)) Feb 2026 – Present

- Built and deployed a Next.js REST API for QR-based attendance: admin authentication against a Google Sheets datastore, and attendance marking with duplicate-check, timestamp updates, and invalid-user validation.
- Integrated Google Cloud Service Account authentication, QR payload parsing (plain-text and JSON), and deployed on Vercel with environment-based secrets — actively used for live club events.

Tech Stack: Next.js, Google Cloud Platform (GCP), Google Sheets API, Service Accounts, Vercel, Node.js, REST APIs

PhishGuard — Cybersecurity Awareness & Phishing Defense PlatformFeb – Mar 2026

- Architected backend for a phishing simulation & adaptive security training platform — scalable Firestore schema, XP progression engine, real-time leaderboard via Firestore listeners, and RBAC with multi-provider auth (Google, Email, Guest)
- Built AI-assisted quiz modules using Google Gemini API, phishing simulation logic, and granular Firebase Storage security rules; deployed via CI/CD to Firebase Hosting with production-ready security configuration

POSITION OF RESPONSIBILITY

Project Maintainer — ACWoC '26 | Android Club, VIT Bhopal ([WEBSITE LINK](#)) Feb 2026

- Selected as Project Maintainer for Android Club Winter of Code '26 — reviewed pull requests, provided structured code review, and guided open-source contributors through feature development and bug fixes.
- Enforced CI/CD workflows, maintained technical documentation, and mentored contributors on React.js, TypeScript, Firebase, Tailwind CSS, and Zustand best practices in a real-time collaborative codebase.

Technical Team Core Member | FYI Club, VIT Bhopal Sep 2025 – Present

- Owned end-to-end technical delivery for club events with 50+ participants — built event registration systems, QR-based check-in infrastructure (SwiftCheck-FYI), and real-time attendance pipelines used in production.
- Developed and maintained the club's official website; mentored junior members in web development; coordinated across design, content, and engineering sub-teams.

Technical Team Core Member | CloudZone Club, VIT Bhopal Oct 2025 – Present

- Organized and managed cloud-focused technical events with 100+ participants — handled registration workflows, on-ground technical support, and cloud infrastructure for the club's digital platforms.
- Delivered internal workshops on GCP fundamentals and cloud deployment to club members.

CERTIFICATES

- HEALTH HACKATHON '26 — NATIONAL FINALIST, TOP 60 / 600+ TEAMS | VIT BHOPAL × JOHNS HOPKINS UNIVERSITY
- [Cloud Computing - NPTEL \(Nov 2025\) Credential ID: NPTEL25CS107S353201197 - TOP 5%](#)
- [GCP CLOUD ARCADE\(100+ BADGE\)](#)
